Interior accessible design according to DIN 18040-1

Eurokey lock

Alarm light

Alarm pull cord switch

Accessible WC cabin with DIN certification

For trade fairs, events and in public areas, **authorities increasingly require WC containers** that are accessible for disabled people.

Then CONTAINEX has **the right solution** for you!
The new version of the accessible WC cabin from CONTAINEX is certified in accordance with **DIN 18040-1 ("accessible construction")**.
This container meets the highest expectations.

Your advantages:

- Certified to DIN18040-1 (reg.nr. P1B064)
- Stable and high-quality features
- Ideal for temporary or long term use
- Also can be delivered with other combinations (eg. 20 ft female/male/barrier-free)
- Alternative options are available

Our factories

The **long term partnership** with certified production sites, owned by CONTAINEX, ensures a **high and controlled product quality**.

We push energy efficient construction methods, with the usage of recyclable materials and **environmental manufacturing methods**. The production of the portable and sanitary cabins and storage containers is carried out according to the environment and quality standards (Green Technology).

Further information on environment and quality measures undertaken by CONTAINEX can be found in the CTX-SSHE-Q-report (Safety-Security-Health-Environment-Quality). You can ask your CONTAINEX sales manager for a copy.

GREEN technology stands for

- Selection and use of recyclable materials
- Energy efficient and environmentally friendly production in certified, European production plants
- Continuous quality inspections and environmental audits in the production plants
- Long product life

Production of portable and sanitary cabins is undertaken according to strict environmental and quality standards.
